

# Our Vision

At Cath's Kindy our aim is to provide a home like environment, warm, friendly and inviting. We encourage our families' involvement and participation in their child's interests and development. We want not only the children to feel comfortable but also our families. We promote open communication without time restrictions which is reflected in our Open Door Policy.

Our programs conform to the Early Years Learning Framework. They are designed to be interest based, spontaneous and with a strong focus on family input and intentional teaching. When a child is supported, nurtured and feels a sense of belonging, they will learn. Every child has strengths in different areas of development. Learning is fun, it can be as an individual or in a group environment with their peers and educators. Learning and development is not a race, each individual child will develop at their own pace.

Our program is structured with a strong focus on the social aspects of each child as they develop and this enables them to build confidence and prepare them for their schooling transition.

Cath's Kindy, whilst a privately owned Centre, has a strong link with our Community and will strive to ensure that we not only support our children, but also the wider Community.
